

Regulation (EU) 2025/40 Packaging and Packaging Waste Regulation (PPWR) Compliance Statement

Conax Technologies (Conax) is committed to compliance with the applicable requirements of Regulation (EU) 2025/40 on packaging and packaging waste (PPWR). As part of our regulatory compliance program, Conax is actively evaluating the packaging used across our products and supply chain and is implementing processes to address applicable PPWR requirements within the required regulatory timelines.

To support compliance with the PPWR, Conax is implementing the following actions:

1. **Packaging Compliance Review**
Conax is conducting a systematic review of all packaging used in connection with our products. The review includes, as applicable, packaging materials, components, weight, volume, composition, recyclability, and the intended function of the packaging. Applicable PPWR requirements are being evaluated against the packaging configurations identified through this review.
2. **Packaging Supplier Compliance**
Conax is engaging our packaging suppliers to obtain appropriate PPWR compliance statements, declarations, and/or implementation plans. Supplier information will be evaluated as part of Conax's assessment of packaging compliance and will be maintained as supporting documentation where appropriate. Where suppliers identify requirements that are not yet fully implemented, Conax will review the applicable implementation plans and assess the actions and timing necessary to support compliance with the applicable PPWR requirements.
3. **Excessive and Unnecessary Packaging Assessment**
Conax is reviewing packaging designs and configurations to identify excessive, unnecessary, or avoidable packaging. This assessment considers packaging weight, volume, material usage, empty space, and functionality. The results of this assessment will be used to identify opportunities for packaging reduction or redesign and to prepare for the applicable 2030 PPWR requirements concerning packaging minimization.

This statement reflects Conax's current PPWR compliance activities and implementation program. It does not constitute a product-specific EU Declaration of Conformity unless expressly identified as such.
